

SAICE Project Management & Construction Division

Site visit: Oiltanking MOGS Saldanha

09 October 2019

- Construction of 12 reinforced concrete crude oil storage tanks with a capacity of 1.1 Million barrels each
- Each tank is 110m x 110m x 18m high
- Oiltanking Mogs Saldanha (OTMS) are undertaking the development of a crude oil storage and blending terminal at Saldanha, Western Cape, South Africa. The terminal will serve a wide range of customers including oil producers, traders and refineries.
- The Port of Saldanha Bay is strategically located on shipping routes between Asia, West Africa and America.
- Together with its port infrastructure and storage facilities, Saldanha Bay has the potential to become a major international crude oil storage, blending and transhipment terminal.

Venue: Saldanha. Map and further details will be provided on confirmation of booking

Time: 10am

Price: No charge
