Askam-in-Furness, Cumbria LA16 7DN

Telephone 0788 250 2405

Email ryanterps@hotmail.co.uk

Date of Birth 13 January 1986

Marital Status Single

ABOUT ME AND MY SKILLS

IN GENERAL a perfectionist with an exceptional eye for detail, taking concepts from an initial brief or idea to a perfectly crafted finished piece...

PROGRAMS AND APPLICATIONS... specializing mostly in Adobe Creative Suite, using programs such as InDesign, Photoshop, Illustrator, and also Dreamweaver, however my web experience is mostly Visual Studios based, using ASPX, not hard coding...but I have the ability to work alongside developers and produce concepts and edit code and frameworks.

AND A LITTLE BIT ABOUT ME... Well I am a very self motivated person, I love to travel and have a real passion for getting out there and experiencing new things. Apart from my infatuation with design, I also DJ in my spare time and have been lucky enough to played nights for MTV and Cream.

MY WORK EXPERIENCE

TRUE GRC // SOUTH LAKES // UK

November 2010 - Present // Graphic / Web Designer

I am currently working for a group with many different inter-linking companies, here I am in charge of all the different companies branding and websites. This was a fantastic opportunity for me to help build up my web portfolio and get the chance to uniquely create my own brands and implement my own styles into existing ones, whilst doing this also receiving some input from group colleagues to get their eyes and ideas. My first project was to create the logo and website for the actual group, as you will see in my portfolio.

MEADE INVESTMENTS PLC // LONDON // UK

Jan 2010 – November 2010 // Graphic Designer

Here I worked within a design department for an investment company in North London, my position included creating all the design and marketing material for internal clients such as 'bocycare', a company offering on-site health screening to corporate companies, as a designer I created posters and advertising campaigns, also magazines, brochures and front-end web media.

IZZY INC LTD // MSIDA // MALTA

Jan 2009 - September 2009 // Senior Creative Designer

Izzy Inc was busy design studio, where I was responsible for ensuring all design work which went out was completed in a timely manner, and always to the best possible standard. To make sure this was done to the design team's maximum potential this saw me help colleagues become proficient in the latest design programs. I was also responsible for my own client's artwork ranging from corporate identity to magazines, one which went out with the Times of Malta every month.

MILNERS // SOUTH LAKES // UK

Jan 2007 - Jan 2009 // Graphic Designer

At HSP Milners I liaised with both new and existing clients, which were both local and national. I could take an initial concept right through to a finished design or alternatively tailor designs to meet the client's specific needs. Whilst working within a full-time Mac environment I created designs predominately using Adobe Creative Suites and Quark. I also gained extensive knowledge on pre-press and true flow plate setting systems.

/ Design & Print House

FINGER PRINTS // SOUTH LAKES // UK

Sept 2004 – Jan 2007 – Graphic Designer

Finger prints provided me with, not only the opportunity to gain extensive knowledge but also gave me an excellent grounding for a career within the design and print industry. Here I developed a great understanding of the day to day running of a busy, modern design studio allowing me to produce high quality work for all kinds of clients using PC's. I used the following programs on a daily basis Adobe Photoshop, In Design, Illustrator, also gaining knowledge on Corel Draw.
