

In memory of Classien Smit

Age 79 Years

Classien Smit was a lively 79 year old who spent 80% of her day driving old people around to do their errands.

Whenever she drove, she kept her handbag in the boot & her cell phone in her left bra cup.

Here are the pictures of that breast showing clearly the result. The other breast had no cancer.

A mammogram and five sonars in March and at the beginning of April did not pick up the cancer.

Classien was finally diagnosed with severe breast cancer on 20th April 2009 and died June 4th 2009.

We thank her family for sharing her story. Do not carry your cell phone on your body. May this help save more lives especially those of our children.
